

Make your own cartouche

1. Sand all 4 corners of your cartouche until they feel smooth.

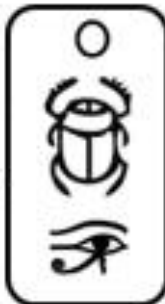

2. Use the tool to draw an oval around the edge of the metal. This line will keep bad things away from your name and keep you safe.

3. Write your name in hieroglyphs inside the protective line. Use your nickname or initials if your name is long.

4. Decorate the back of your cartouche with some protective symbols – these will help to keep you safe.

5. Finish your cartouche by threading the cord through the hole to make a necklace. Place your cartouche around your neck and wear it to keep you safe!

A		H		N		U	
B		I		O		V	
C	 or 	J		P		W	
D		K		Q		X	 
E	 or  or 	L		R		Y	 or 
F		M		S		Z	
G		T		SH
